Please replace the following paragraphs with these amended versions.

[0001] This application relates to the concurrently filed and commonly-assigned United States Application No. 10/813,492 ~~XX/XXX,XXX (amend with serial number)~~ (Attorney Docket 030820), of which the "Brief Summary of the Invention" section and the "Detailed Description of the Invention" sections are incorporated herein by reference.

[0002] This application also relates to the concurrently filed and commonly-assigned United States Application No. 10/813,475 ~~XX/XXX,XXX (amend with serial number)~~ (Attorney Docket 040056), of which the "Brief Summary of the Invention" section and the "Detailed Description of the Invention" sections are incorporated herein by reference.

[0007] This invention discloses methods, systems, and products for verifying the integrity of web server content. One of the embodiments describes a combined client-resident and server-resident content-integrity tool that helps identify integrity problems. One method receives results from a client-resident integrity program and from a server-resident integrity program. The client-resident integrity program operates on a client computer, while the server-resident integrity program operates on a web server. This invention merges the results from the client-resident integrity program and from the server-resident integrity program. The merged results are then presented at a computer system.[[.]]

[0018] The client-resident integrity program 24 and the server-resident integrity program 26 are not described in detail. If the reader desires a more detailed explanation of the client-resident integrity program 24, the reader is directed to the concurrently filed and commonly-assigned United States Application No. 10/813,492 ~~XX/XXX,XXX (amend with serial number)~~ (Attorney Docket 030820), of which the "Brief Summary of the Invention" section and the "Detailed Description of the Invention" sections are incorporated herein by reference. The server-resident integrity program 26, similarly, is not further described. If the reader desires a
